

1. Overview

This Refund Policy defines the conditions under which customers may request a refund for products purchased through official channels. The policy ensures fair treatment of customers while protecting the company from misuse of refund mechanisms.

Refunds are processed strictly according to eligibility criteria, verification procedures, and applicable timelines described in this document.

2. Eligibility for Refund

A refund may be considered under the following conditions:

- The product received is defective due to manufacturing issues confirmed by technical inspection
- The product delivered is incorrect (wrong model, size, or specification) compared to the order
- The product is missing essential components at the time of delivery
- The product is damaged during transit (only if reported within the specified time window)
- The order is canceled before shipment is dispatched

Refund requests that do not meet these conditions will not be approved.

3. Non-Refundable Situations

Refunds will NOT be issued in the following cases:

- Products damaged due to misuse, mishandling, or negligence after delivery
 - Requests raised after the refund claim window has expired
 - Products returned without original packaging, accessories, or proof of purchase
 - Minor cosmetic variations that do not affect product functionality
 - Products that have been repaired or altered by unauthorized service providers
 - Change of mind after successful delivery (unless explicitly covered under a separate return policy)
-

4. Refund Request Time Window

Customers must initiate refund requests within a defined period:

- For damaged or incorrect products: within 24–48 hours of delivery

- For cancellation before dispatch: before the order is shipped
- For defective products: within the standard warranty evaluation period (if applicable)

Requests raised after the allowed timeframe may be rejected without review.

5. Initial Verification Process

All refund requests undergo a structured verification process:

- Validation of order details (invoice, order ID, purchase date)
- Verification of issue description provided by customer
- Collection of supporting evidence such as images or videos
- Technical evaluation by authorized service personnel (if required)

Only verified claims proceed to refund approval stage.

6. Refund Methods

Approved refunds are processed through the original payment method used during purchase. Depending on the payment type, the refund method may vary:

- **UPI Payments:** Refund credited directly to the linked bank account or UPI ID
- **Debit/Credit Cards:** Refund processed back to the same card account
- **Net Banking:** Refund transferred to the originating bank account
- **Wallet Payments:** Refund credited back to the same digital wallet

In cases where the original method is unavailable, an alternate bank transfer may be used after verification.

7. Refund Processing Timeline

Refund processing occurs in multiple stages and may take time depending on banking systems and verification requirements:

- Initial claim review: 2–5 business days
- Technical inspection (if required): 3–7 business days
- Final approval and processing: 5–10 business days after approval

Total refund completion time may range from **7 to 15 business days**, depending on payment gateway and bank processing speeds.

Delays caused by banking networks or third-party payment systems are outside company control.

8. Partial Refund Conditions

Partial refunds may be issued in certain situations:

- Missing accessories or components that do not affect core functionality
- Minor damage where product is still usable after repair
- Return requests where only part of a bundled order is eligible
- Deductions for usage, wear, or handling damage prior to return approval

The refundable amount will be calculated after inspection and documented clearly before processing.

9. Refund Rejection Conditions

Refund requests may be rejected if:

- Evidence provided is insufficient or inconsistent
- Product condition does not match reported issue upon inspection
- Request is outside the allowed refund time window
- Customer fails to provide required documents or cooperation during verification
- Product is found to be fully functional after testing

Rejected claims will be communicated with reason codes where applicable.

10. Chargebacks and Disputes

If a customer initiates a chargeback or payment dispute with their bank:

- The refund process through the company may be paused until resolution
- Supporting documentation will be provided to payment processors if required
- Final resolution will depend on the outcome of the banking dispute process

Customers are encouraged to contact support before initiating chargebacks

11. Return Condition for Refund Approval

Where physical return of a product is required, the following conditions apply:

- Product must be returned in original condition, including packaging, manuals, and accessories
- Serial numbers, labels, or identification tags must be intact and readable

- Product must not show signs of tampering, unauthorized repair, or physical abuse
- Return shipping must be initiated only after approval from support team
- In certain cases, reverse pickup may be arranged by the company or its logistics partners

Failure to meet return conditions may result in refund cancellation or partial deduction.

12. Refund Deduction Rules

Certain deductions may apply before refund is finalized:

- Shipping or logistics charges (if applicable and non-refundable)
- Handling or restocking fees in cases of non-defective returns
- Value reduction due to product usage, damage, or missing components
- Bank/payment gateway processing fees where applicable

Final refund amount is communicated after inspection and approval.

13. Fraud Prevention and Misuse Control

To maintain policy integrity, the company actively monitors fraudulent or abusive refund activity.

Refund requests may be rejected or escalated if:

- Multiple refund claims are made for the same product without valid cause
- False damage reports or manipulated evidence are submitted
- Products are deliberately damaged to claim refunds
- Order histories indicate repeated policy abuse

The company reserves the right to suspend accounts involved in fraudulent activity and restrict future purchases.

14. Order Cancellation and Refund Linkage

Cancellation and refund are treated as separate processes:

- Orders canceled before shipment qualify for full refund without deduction
- Orders canceled after dispatch may be treated as return/refund cases
- Custom, personalized, or non-returnable products may not be eligible for cancellation once processed

- Refund timelines begin only after cancellation approval is confirmed
-

15. Force Majeure Impact on Refunds

Refund processing may be delayed or modified due to extraordinary circumstances such as:

- Natural disasters, floods, earthquakes, or extreme weather conditions
- Government restrictions, lockdowns, or regulatory actions
- System outages affecting payment gateways or logistics networks
- Large-scale disruptions in supply chain or courier services

In such cases, timelines will be extended reasonably until normal operations resume.

16. Policy Updates and Amendments

The company reserves the right to modify or update this Refund Policy at any time.

- Updated policies apply to all new orders placed after publication
 - Existing orders will be governed by the policy version active at the time of purchase
 - Customers are advised to review policy updates periodically
-

17. Customer Support and Contact

For refund-related queries, customers may contact the official support channel with:

- Order ID
- Registered contact details
- Issue description and supporting evidence

All refund decisions are finalized only after verification by the support and finance teams.
