

1. Overview

This Shipping Policy outlines the terms and conditions related to order processing, dispatch, transit, and delivery of products. It applies to all purchases made through official sales channels.

The company aims to ensure timely, safe, and reliable delivery of all products to customers while maintaining transparency in logistics operations.

2. Order Processing Time

All confirmed orders are processed within standard business timelines.

- Orders are typically processed within 24–72 hours after payment confirmation
- Orders placed on weekends or public holidays are processed on the next working day
- In case of high order volume or special product requirements, processing time may extend slightly

Customers are notified once the order has been successfully processed and dispatched.

3. Shipping Confirmation

Once an order is shipped, the customer will receive a shipping confirmation notification containing:

- Tracking ID
- Courier partner details
- Estimated delivery timeline
- Dispatch status link (if applicable)

Tracking information may take up to 24 hours to become active after dispatch.

4. Delivery Timeline

Delivery times depend on the customer's location and logistics partner availability.

- Metro cities: 2–5 business days
- Tier-2 and Tier-3 cities: 4–8 business days
- Remote or rural areas: 7–12 business days (approximate)

Delivery timelines are estimates and may vary due to external factors such as weather conditions, courier delays, or regional restrictions.

5. Shipping Charges

Shipping charges depend on order value, location, and promotional offers active at the time of purchase.

- Free shipping may be offered on orders above a defined threshold (as displayed at checkout)
- Standard shipping charges apply for orders below the free-shipping threshold
- Additional charges may apply for expedited or priority delivery options
- Remote locations or special handling deliveries may incur extra logistics costs

All applicable charges are clearly displayed before order confirmation.

6. Courier Partners and Logistics Handling

Orders are shipped through third-party logistics providers selected based on serviceability, speed, and reliability.

- Multiple courier partners may be used depending on destination
- The company reserves the right to switch logistics partners without prior notice to improve delivery efficiency
- Once dispatched, responsibility for transit lies with the respective courier partner, although support assistance is provided for tracking and issue resolution

Customers are advised to ensure accurate delivery details to avoid delays or misrouting.

7. Address Accuracy and Delivery Issues

Customers must provide complete and accurate shipping information at the time of order placement.

- Incorrect or incomplete addresses may result in delayed or failed delivery
- If a delivery attempt fails due to customer unavailability or incorrect details, re-delivery may incur additional charges
- The company is not responsible for delays caused by inaccurate address information provided by the customer

Customers should verify their address before confirming the order.

8. Shipment Tracking and Updates

Once dispatched, orders can be tracked using the provided tracking ID.

- Tracking updates depend on courier system refresh cycles

- In some cases, tracking status may not update in real-time
- Customers may contact support if tracking information remains unchanged for more than 48 hours

Notifications regarding major shipment milestones (dispatch, transit, out-for-delivery, delivered) may be sent via SMS or email.

9. Delivery Attempts and Non-Delivery

Courier partners typically attempt delivery 1–3 times before marking an order as undeliverable.

- If the customer is unavailable, reattempts will be made as per courier policy
- If delivery fails repeatedly, the shipment may be returned to origin
- Reshipping of returned orders may incur additional charges

Customers are advised to remain reachable during the expected delivery window.

5. Shipping Charges

Shipping charges depend on order value, location, and promotional offers active at the time of purchase.

- Free shipping may be offered on orders above a defined threshold (as displayed at checkout)
- Standard shipping charges apply for orders below the free-shipping threshold
- Additional charges may apply for expedited or priority delivery options
- Remote locations or special handling deliveries may incur extra logistics costs

All applicable charges are clearly displayed before order confirmation.
