

TECHMART ELECTRONICS WARRANTY POLICY

Version 1.0

Effective Date: January 1, 2026

Introduction

This Warranty Policy outlines the warranty coverage provided by TechMart Electronics for products purchased through TechMart's official website, authorized retailers, and approved distribution partners. The policy explains the warranty period, coverage conditions, claim procedures, exclusions, customer responsibilities, and available warranty services for all eligible TechMart products.

TechMart Electronics is committed to delivering reliable, high-quality products backed by professional after-sales support. Every product undergoes comprehensive quality assurance testing before shipment. However, if a manufacturing defect is identified during the applicable warranty period, TechMart will repair or replace the affected product in accordance with the terms and conditions described in this document.

This Warranty Policy applies only to genuine TechMart Electronics products purchased through authorized sales channels. Products obtained from unauthorized sellers, modified devices, counterfeit products, or products with altered serial numbers are not covered under this warranty.

Customers are encouraged to register eligible products shortly after purchase to simplify future warranty claims and improve access to customer support services. Product registration is recommended but is not mandatory when valid proof of purchase is available.

This document should be read together with the Product Catalog, Price Guide, Shipping Policy, Returns and Refund Policy, Product Registration Guide, and Extended Warranty Guide for a complete understanding of TechMart's customer support services.

Warranty Coverage Overview

TechMart Electronics provides a limited manufacturer's warranty that covers defects in materials and workmanship occurring during normal use under the specified warranty period.

If a covered defect is confirmed by an authorized TechMart service center, TechMart may, at its discretion:

- Repair the product using new or certified replacement parts.
- Replace defective components.
- Replace the entire product with an equivalent model.

- Issue a replacement unit of equal or greater specifications if the original model has been discontinued.
- Provide a refund only where required under applicable consumer protection laws or when repair and replacement are not feasible.

Warranty services are performed by authorized TechMart technicians using genuine replacement parts whenever reasonably available.

Repair or replacement under warranty does not extend the original warranty period unless otherwise required by local law.

Standard Warranty Period

The following warranty periods apply to products sold by TechMart Electronics.

Product Category	Standard Warranty
AeroBook 14	24 Months
AeroBook Pro 15	24 Months
Titan Gaming G15	24 Months
Titan Gaming G17	24 Months
BusinessBook B14	36 Months
Nova X	12 Months
Nova Pro	12 Months
Nova Ultra	12 Months
Tab Lite 10	12 Months
Tab Pro 12	12 Months
Pulse Fit	12 Months
Pulse Pro	12 Months
AirBuds Lite	12 Months
AirBuds Pro	12 Months
SoundMax 50	12 Months
SmartCam S2	24 Months
Home Hub	24 Months

Product Category	Standard Warranty
Smart Plug	12 Months
65W Fast Charger	6 Months
100W GaN Charger	12 Months
USB-C Dock	12 Months
Wireless Mouse	12 Months
Mechanical Keyboard K1	12 Months
USB-C Cable	6 Months
Laptop Sleeve	No Manufacturer Warranty

Warranty coverage begins on the original purchase date shown on the customer's invoice or sales receipt.

Customers should retain proof of purchase throughout the warranty period as it may be required during claim verification.

Products Covered Under Warranty

The TechMart limited warranty covers eligible products that develop manufacturing defects during normal operation.

Coverage includes:

- Factory manufacturing defects.
- Hardware component failures resulting from normal use.
- Internal electronic failures.
- Display defects that occur under normal operating conditions.
- Battery defects caused by manufacturing faults during the warranty period.
- Keyboard failures not caused by accidental damage.
- Motherboard failures due to manufacturing defects.
- Charging port failures resulting from normal usage.
- Wireless connectivity failures caused by internal hardware defects.
- Camera hardware failures.
- Speaker and microphone hardware defects.
- Cooling fan failures caused by manufacturing issues.

- Storage device failures not caused by customer modification.

Each warranty claim is evaluated individually by authorized TechMart technicians to determine eligibility.

Warranty Registration

Although product registration is optional in many regions, TechMart strongly recommends registering eligible devices shortly after purchase.

Registration allows customer support representatives to quickly verify ownership, warranty status, product specifications, and service history.

Customers may register products by providing:

- Product serial number.
- Proof of purchase.
- Purchase date.
- Retailer information.
- Customer contact details.

Registration does not replace the requirement to retain the original purchase receipt.

Warranty Eligibility

A product is generally eligible for warranty service if all of the following conditions are satisfied:

- The product was purchased through an authorized TechMart retailer or distributor.
- The warranty period has not expired.
- The product serial number is intact and legible.
- The reported issue is covered under this Warranty Policy.
- The product has not been modified, tampered with, or repaired by an unauthorized service provider.
- Valid proof of purchase can be provided upon request.

Meeting these requirements helps ensure that warranty claims can be processed efficiently and without unnecessary delays.

Warranty Coverage by Product Category

While all TechMart products are manufactured to high quality standards, warranty coverage varies depending on the type of product, its intended use, and its expected service life. The following sections describe the warranty terms applicable to each major product category.

Laptop Warranty

The TechMart laptop series—including the AeroBook 14, AeroBook Pro 15, Titan Gaming G15, Titan Gaming G17, and BusinessBook B14—is covered under the TechMart Limited Manufacturer Warranty for the duration specified in the Warranty Coverage Overview.

Warranty coverage applies to manufacturing defects affecting internal hardware components during normal consumer or business use.

Covered components may include:

- Motherboard
- Processor
- Factory-installed RAM
- Factory-installed SSD
- Integrated display panel
- Keyboard
- Touchpad
- Cooling fans
- Internal speakers
- Webcam
- Wi-Fi and Bluetooth modules
- Charging port
- Internal power circuitry
- Fingerprint reader (where applicable)

If a covered hardware component fails during the warranty period, TechMart will inspect the device and determine whether repair or replacement is appropriate.

Customers should back up important data before submitting a laptop for service. TechMart is not responsible for the loss of personal files, installed software, or user-generated content during the repair process.

Smartphone Warranty

The Nova X, Nova Pro, and Nova Ultra smartphones include a 12-month limited manufacturer's warranty covering defects in materials and workmanship under normal operating conditions.

Covered components include:

- Display panel (manufacturing defects only)
- Internal motherboard
- Factory-installed battery (manufacturing defects)
- Cameras
- Speakers
- Microphones
- Fingerprint sensor
- Face recognition hardware
- USB-C charging port
- Internal antennas
- Wireless communication hardware
- Power management circuitry

Normal battery aging is considered a natural characteristic of rechargeable batteries and is not, by itself, considered a manufacturing defect.

Warranty service does not cover cosmetic wear, scratches, dents, or damage resulting from accidental impact or liquid exposure.

Tablet Warranty

The Tab Lite 10 and Tab Pro 12 are covered by a 12-month limited warranty against manufacturing defects.

Coverage includes:

- Display hardware defects
- Touchscreen functionality
- Internal processor
- Memory
- Storage
- Charging circuitry
- USB-C connector
- Cameras
- Audio hardware
- Wireless connectivity components

The optional stylus supplied with the Tab Pro 12 is covered for manufacturing defects under the same warranty period unless otherwise specified in regional documentation.

Smartwatch Warranty

The Pulse Fit and Pulse Pro smartwatches include a 12-month manufacturer's warranty.

Covered components include:

- Display
- Touchscreen
- Heart rate sensor
- Blood oxygen sensor
- GPS hardware (Pulse Pro)
- Internal battery (manufacturing defects)
- Bluetooth module
- Charging contacts
- Buttons
- Internal electronics

Water resistance is tested under controlled laboratory conditions. Damage resulting from improper use beyond the product's specified water-resistance rating is not covered.

Audio Product Warranty

The AirBuds Lite, AirBuds Pro, and SoundMax 50 Bluetooth Speaker are covered by a 12-month limited warranty.

Warranty coverage includes:

- Charging circuitry
- Bluetooth connectivity hardware
- Factory-installed batteries (manufacturing defects)
- Speakers
- Microphones
- Charging case electronics
- USB-C charging interface
- Internal circuit boards

Replacement ear tips, protective pouches, and other consumable accessories are not covered unless they contain manufacturing defects at the time of purchase.

Smart Home Product Warranty

TechMart Smart Home devices are designed for reliable long-term operation when installed and used according to the supplied instructions.

Covered devices include:

- SmartCam S2
- Home Hub
- Smart Plug

Warranty coverage includes:

- Internal electronic components
- Wireless communication hardware
- Factory-installed firmware
- Power management circuits
- Motion sensors
- Camera hardware (SmartCam S2)
- Internal control boards

Damage caused by incorrect electrical installation, incompatible voltage, unauthorized modifications, or improper environmental conditions is not covered.

Accessory Warranty

TechMart accessories are covered according to their respective warranty periods.

Eligible accessories include:

- 65W Fast Charger
- 100W GaN Charger
- USB-C Dock
- Wireless Mouse
- Mechanical Keyboard K1
- USB-C Cable

Warranty coverage applies to manufacturing defects affecting normal operation.

Examples include:

- Charger fails to provide power.
- USB-C Dock stops functioning under normal usage.
- Mouse buttons fail prematurely.
- Keyboard switches develop manufacturing defects.
- Cable connectors fail due to manufacturing issues.

The Laptop Sleeve is considered a protective textile accessory and does not include a standard manufacturer's warranty except where required under applicable consumer protection laws.

Battery Coverage

Rechargeable batteries naturally lose capacity over time as part of normal use. This gradual reduction in battery performance is expected and does not automatically indicate a manufacturing defect.

Warranty coverage applies only when an authorized TechMart technician determines that the battery has failed due to a manufacturing fault during the applicable warranty period.

Battery replacement under warranty may be approved if diagnostic testing confirms that the battery no longer meets TechMart's minimum operational standards because of a covered defect rather than normal aging or misuse.

Display Coverage

TechMart products are manufactured using high-quality display panels that undergo extensive inspection before shipment.

Warranty coverage may apply to:

- Manufacturing defects in the display panel.
- Display hardware failure.
- Backlight failure.
- Display connector defects.
- Factory-confirmed dead pixel issues that exceed TechMart's quality thresholds.
- Screen flickering caused by internal hardware defects.

Warranty coverage does **not** include:

- Cracked screens.
- Broken glass.

- Impact damage.
- Pressure damage.
- Scratches.
- Liquid damage affecting the display.
- Damage caused by unauthorized repairs or modifications.

Customers are encouraged to use protective cases and screen protectors where appropriate to reduce the risk of accidental damage.

6. Warranty Claim Process

To initiate a warranty claim, the customer must follow the standard verification procedure. Claims can only be processed if the product is within the valid warranty period and meets the eligibility conditions mentioned earlier.

Step 1: The customer must contact customer support through the official support channel and provide the product details such as model name, purchase date, and serial number.

Step 2: Proof of purchase (invoice or receipt) is mandatory. Without valid proof, the claim may be rejected.

Step 3: The issue must be clearly described, including symptoms of failure, usage conditions, and any troubleshooting already performed.

Step 4: Based on the initial assessment, the support team may request product inspection, photo/video evidence, or physical submission of the product to an authorized service center.

Step 5: After verification, the product will either be repaired, replaced, or rejected based on warranty applicability.

7. Service and Inspection Guidelines

All warranty services are subject to technical inspection. The final decision regarding repair or replacement is made only after diagnostic evaluation by authorized technicians.

If the defect is confirmed as a manufacturing issue, service will be provided free of cost. If the issue is found to be caused by external factors such as mishandling or unauthorized modifications, standard repair charges may apply.

Customers are advised not to attempt self-repair, as it may void the warranty.

8. Warranty Limitations

The warranty is strictly limited to repair or replacement of defective parts and does not extend to any additional compensation.

The company shall not be responsible for:

- Data loss or software corruption during product failure
- Losses caused by downtime or service interruption
- Damage caused during transportation not arranged by authorized service providers
- Issues arising from compatibility with third-party accessories or systems

9. Exclusions from Warranty Coverage

The warranty does not cover the following conditions:

- Physical damage such as cracks, dents, broken ports, or display damage due to impact or fall
- Water, liquid, or moisture damage unless explicitly mentioned in product specifications
- Damage caused by electrical surges, improper voltage supply, or use of non-standard adapters
- Products that have been opened, repaired, or modified by unauthorized persons or service centers
- Normal wear and tear including cosmetic deterioration, scratches, and fading over time
- Consumable parts such as batteries (after specified cycle limit), cables, or accessories unless separately covered

Any product found under these conditions will be treated as out-of-warranty service.

10. Replacement Policy

Replacement is only applicable when the product is found to have a manufacturing defect that cannot be repaired.

Conditions for replacement:

- Failure occurs within the initial warranty evaluation period
- Same issue persists after multiple repair attempts (as per service policy)
- Replacement approval from authorized service authority

Replaced units may be new or refurbished of equivalent specifications, depending on availability.

11. Transfer of Warranty

Warranty is generally non-transferable and applies only to the original purchaser.

However, in specific cases where resale or transfer is permitted by company policy, the warranty continues only if:

- Original proof of purchase is available
- Product remains within the original warranty period
- No violation of warranty terms has occurred

12. Customer Responsibilities

Customers are expected to handle the product responsibly to ensure warranty validity. This includes:

- Using the product strictly as per the user manual and safety guidelines
- Ensuring proper installation and usage conditions
- Keeping the original invoice, warranty card, and packaging (if required for claims)
- Avoiding exposure to extreme temperature, moisture, dust, or unstable power supply
- Not attempting any unauthorized repair or modification

Failure to follow proper usage guidelines may lead to warranty rejection.

13. Dispute Resolution

In case of disputes regarding warranty claims, inspection results, or service decisions, the matter will be reviewed by the company's support escalation team.

If required, the product may undergo re-evaluation at a higher-level service center. The final decision after escalation will be considered binding under company policy.

14. Limitation of Liability

The company's liability is strictly limited to repair or replacement of the defective product under warranty terms.

The company shall not be liable for any indirect, incidental, or consequential damages including loss of data, business interruption, or financial loss arising from product failure.

15. Termination of Warranty

The warranty will automatically terminate if:

- The warranty period expires
- The product is found tampered or opened by unauthorized personnel

- False or incomplete information is provided during claim registration
- The product is used in violation of stated guidelines

Once terminated, no further warranty claims will be accepted.
